Subject: Providing Investigators with the Ability to Solve Crimes Faster
Date: Friday, July 12, 2019 7:04:28 AM

Warning: This email originated from outside the City of Bakersfield. Think before you click!

Dear Dennis:

Many law enforcement agencies have discovered how NeoFace® WideNet can help them investigate and solve crimes more quickly and easily. NeoFace WideNet turns previously unusable video face images into trustworthy hard evidence. Not only that, but this service also enables searches against large mugshot and video repositories to provide an easy-to-access list of image candidate matches.

With universal browser compatibility, NeoFace WideNet is scalable and affordable for agencies of all sizes, and it easily integrates with existing systems and operations.

NEC has long been a leader in integrated, high availability biometric identification systems. For the first time, multiple agencies can share mugshot databases with each other using NEC's powerful #1 NIST-ranked facial recognition algorithm, the industry's fastest and most accurate face-matching algorithm. Turn your images into evidence – learn more.

Let NEC help take your law enforcement agency to the next level. Give me a call or reply to this email today and we'll set up a time to talk.

Best Regards,

Kelly Gallagher
